REPAIRS CAUSE WATER CUTS

WATER supplies to some parts of Pietermaritzburg and Howick were interrupted yesterday, says the uMgungundlovu District Municipality.

The municipal communications manager Mbali Ndlovu said in a statement that this was due to an ongoing project to replace asbestos cement pipes.

Ndlovu said the disruption affected Howick, Karkloof and Pietermaritzburg's Central Business District up to Greendale.

"The municipality profusely apologises for the disruption and inconvenience caused," she said.

Water was expected to be running again by yesterday evening. — WR.
